

HARApad Elite Test Data

HARApad Elite shielding performance on a typical laptop, magnetic field readings below the laptop			
Distance from bottom of laptop	Laptop without HARApad Elite	Laptop with HARApad Elite	% reduction*
At ½ inch	12 mG	1.0 mG	>100%**
At 1 inch	8 mG	2.0 mG	100%
At 3 inch	3 mG	1.9 mG	100%

*with 2 mG background, testing done with frequency weighted 3-axis meter

**% reduction greater than 100% means that the HARApad Elite reduced the radiation to levels *below* the ambient/background level.

*Ambient/background radiation level = .02 mG, resulting in 99.99% HARApad Elite reduction
